Empathy Map

Create an empathy map to understand your customer/user from four perspectives – what they Say, Think, Do, and Feel – in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I want to buy books online easily. • I need genuine books at the best price. • I wish there was a platform with a good collection and fast delivery. • I want a simple and secure checkout process. • I want to track my orders easily.	THINKS • Is this book available? • Is the price reasonable? • Will I get the book on time? • Is the website safe for payments? • Can I return the book if required?
PERSONA NAME <i>Online Book Buyer</i>	
DOES • Browses books by categories. • Searches for books and compares prices. • Adds books to cart or buys directly. • Proceeds to checkout and makes payment. • Tracks order status. • Leaves reviews after receiving the book.	FEELS • Excited to find the book I want. • Happy when the process is smooth. • Confident when payment is secure. • Satisfied with fast delivery. • Frustrated when a book is unavailable or delivery is delayed.
